Size: 20*17*53mm
Thread: 510
Battery Capacity: 400mAh
Charging: Type-C
Housing: PCTG
Voltage Range: 1.8-4.2V
Capability:> 0.80Ω

- 2 -

The diagram illustrates the components of the Yocan Pro 20V kit and their functions:

- 510 Thread:** The top connection point for the atomizer.
- Hanging Hole:** A hole at the top for carrying the device.
- Power Button:** A square button below the hanging hole.
- 400mAh Battery:** The internal battery power capacity.
- OLED Display:** The screen showing voltage (20V), puff count (0000), and battery status (100%).
- Left Button (-):** The minus button for adjusting settings.
- Right Button (+):** The plus button for adjusting settings.
- Type-C Charging port:** The port at the bottom for charging the device.
- Voltage:** The current voltage setting shown on the display (20V).
- Battery Status:** The battery level indicator on the display (100%).
- Puff Counter:** The puff count shown on the display (0000).
- Resistance:** The resistance value shown on the display (0.00Ω).
- Timer:** The time shown on the display (00:00).

- 3 -

1. Turn on/off: Press the power button 5 times quickly.
 2. Connect your 510 cart to the device, OLED display shows the resistance of the cart.
 3. Preheat: Press the power button 2 times quickly to start preheat (at 1.8V). The OLED display will stay on and countdown 10S. To stop preheat manually, press the power button another 2 times quickly.
 4. Adjustable voltage: 1.8-4.2V. Voltage accuracy to 0.1V, Press left (-) and right (+) button to get to desired voltage setting.
 5. Safety cutoff: When the power button is pressed continuously for more than 15 seconds, the OLED display warns OVER TIME and stops working. Release the power button and then press the power button to continue vaping.
 6. Puff Counter & Timer:
- When the device is on and connected with the cart successfully, every time

- 4 -

you press the button over 0.55 counts as one. The counter will reset to zero automatically after it reaches 9999. To reset the counter to zero manually, press the power button and the left (-) button at the same time. The timer records the seconds (<15s) at each time of use.
